SUBJECT INDEX

A
A cells 41
Acetoacetate, influence on glucose metabolism 405
ACTH antibodies, production 167, 313
– binding factor 227
– bioassay method for 133
– immunoreactive human growth hormone after 318
– influence of DHE on lipolysis caused by 164
– radioimmunoassay 302, 313
Actinomycin D, insulin response to 157
Adenosine 3',5'-monophosphate, effect on Δ^5-3β-hydroxysteroid dehydrogenase 114
Adenylcyclase, stimulation by GH 94
Adipose cell, interaction between GH and dihydroergotamine in 161
Adrenal cell, isolated 133
Adrenocortical function in patients with hyperthyroidism or myxoedema 437
– secretion and parathyroid hormone 344
– secretory rate and plasma Ca levels 345
Adsorbing agents for separation in radioimmunoassay 301
African myxedematous cretins 436
AMP, cyclic, effects on insulin and GH secretion 90
– – production 97
Amylase, intracellular transport and distribution 393
Androst-5-ene-3β, 16α, 17β-triol, formation of from dehydroepiandrosterone 293
Androstanolone 53
Angiotensin I, antibody to 203
Antiandrogens, influence on the excretion of FSH, LH and 17-ketosteroids 273
Anti-estrogen, inhibition of estrogen-dependent rat mammary cancer 295
ATP- and ADP content in the liver 289
Atromid, effect on lipogenesis 264
Augmentin s. HL 523 76

B
B cells 41
β cell, glucose metabolism 220
– pancreatic, thyroid hormone-induced increase in sensitivity of 250
Ba^{++} and insulin secretion 65
Blood flow in hind limb of dog 384
– pancreatic insulin in 213
– sugar, influence on lipid metabolism 10
Bradykinin as a local wound hormone 279

C
C_{19} and C_{18}-steroids, analysis in plasma 193
Ca^{++} and GPC content in β cells 143
– and insulin secretion 65
Calcitonin, effect in cows and sheep 363
– in human plasma, radioimmunoassay 297
– hypocitricemic effects 120
– inhibition of gastric secretion by 146
– radioimmunoassay 302
– release after magnesium 63
Calcitonin stimulation of PTH secretion 224
Calcium activity in biologic fluids 49
– dependency of leucine-induced insulin release 374
– effect of calcitonin on 122
– ionized plasma 48
– regulation, feedback mechanism for 344
– tolerance index (CTI) in thyroid disorders 199
– – test 197
– – in thyroid disease 197
Catecholamine-producing tumor 252
Chlorophenoxyisobutyrate (Atromid) 262
Cholesterol release by diabetic livers 18
Chorionic somatomammotropin, human, radioimmunoassay 131
Citrate, effects of calcitonin and thyroid damage on 120
Cod, beta cell of 21
Conn's syndrome, drop in serum potassium in 445
Corticotropic activity in lipolytic fractions from pituitary glands 167
Cortisol addition to GH therapy 9
– and corticosterone in diabetic women during pregnancy 215
– during muscular exercise 368
– effect of $\beta^{1\text{-}24}$ ACTH on plasma 318
– – on incorporation of ^{3}H-deoxycytidine into thymus DNA 277
– hypoglycemic effect 225
– secretion, effect of altered thyroid function upon 437
C-peptide, human, amino acid sequence of 229
– – preparation 229
Cretinism, endemic in Central Africa 431
Cretins, thyroid scanning 434
Cyclic AMP, assay for picomole amounts of 336
– – dependent protein kinase 336
Cyproterone acetate, effect on excretion of FSH, LH and 17-ketosteroids 274
– – proliferation of endoplasmic reticulum 44
– effect on excretion of FSH, LH and 17-ketosteroids 275

D
Decanoate 53
Dehydroepiandrosterone, conversion to Δ^4-androstenedione 116
– sulfatide, perfusion of human liver with 193
2-deoxy-glucose 98
Deuterium oxide, effect on leucine-induced insulin release 375
Dexamethasone, inhibition of GH release by 173
Diabetes, duration, conduction velocities and 390
Diabetic pregnancy 215
Diamox, effect on lipogenesis 264
Dibutyryl-3,5-cyclic AMP (DAMP) and GPG content in β-cells 143
– lipolysis stimulated by 103
Dibutyrylic cyclic AMP, effects on the activation of phosphorylase 333
Dihydroergotamine, GH interaction 321
– lipolytic effect 161
Dog with spontaneous diabetes mellitus 213
Duck, glucagon 258

E
Electrode, calcium-sensitive 48
Epinephrine action, inhibition by thyrocalcitonin 348
– effects on activation of phosphorylase 333
– and GPG content in β-cells 143
– inhibitor of insulin release 91
– lipolysis stimulated by 105
Erythropoietin, production 52
Estradiol, effects on uterine weight, protein and arginase activity 352
Ethacrynic acid, effect on lipogenesis 264
Exercise, plasma glucose and insulin concentrations during 368
Exocrine pancreas, rat, biosynthesis and secretion of amylase and lipase 393

F
Fat cells, isolated 103
– ingestion, effect upon oral glucose tolerance 299
Fenfluramine, inhibition of lipogenesis by 262
Fetal serum IRI 71
Fettstoffwechselhormon, pituitary 167
Fetuses, rat, morphology of pancreas 285
Follicle-stimulating hormone, LH and 17-ketosteroids, excretion after administration of antiandrogens 273
Free fatty acid, endogenous, release from diabetic liver 17

– – – increase induced by glucagon 291
– – – plasma, influence on glucose metabolism 405
Fructose-induced depletion of liver adenine nucleotides 289

G
Gastric secretion, effect of calcitonin on 140
Glibenclamide, effect on hepatic fructose metabolism 447
– and GPG content in β cells 143
Glucagon, amino acid composition 184
– antibodies, induction 57
– content of β cells deficient islets 38
– – in some insulins 57
– effect on levels of cyclic AMP in rat liver 339
– gut and pancreatic circulating in duck 258
– hypocalcemic effect 225
– immunoassay 37
– immunoreactivity 25
– influence of DHE on lipolysis caused by 164
– – of exercise on the pancreatic responsiveness to 371
– large 261
– lipolytic effect 103
– molecular weight 26
– pancreatic and intestinal in the duck 24
– rat, crystals 196
– – isolation 184
– release from β cell deficient islets 38
– – in isolated rat pancreas 238
– secretion, relationship between insulin and 241
Glucagon-like immunoreactivity 258
Glucagon-producing tumor 252
Glucose, blood, in newborn infants 176
– conversion to lipids 329
– following TRF 137
– infusion test 1
– intolerance with excessive insulin responses 235
– – pentobarbital-induced mechanism 243
– – metabolism 326
– – effects of TRIS on 380
– oral, insulin release after 180
– responses to oral glucose in mild glucose intolerance 236
– tolerance, intravenous 1
– – oral, influence of fatty acid ingestion upon 299
– – test in hypophysectomized dogs 6
– uptake, effect of FFA and ketone bodies on 403
– – stereospecific by pancreatic β cells 219
– utilization of human adipose tissue 266
Glucose-stimulated insulin release, inhibition 308
Glycerol level of newborn infants 176
Glycogen, liver, diabetic 17
Granules, secretory 21
– – in islet cell tumor 257
Grave's disease, increased calcium mobilization in 200
Growth hormone, antibody-bound and free, separation 303
– – bovine, insulin response to 157
– – concentrations in MtT-W15 tumor-bearing W/F rats 83
– – and cortisol therapy, effect on insulin response 6
– – effect on glucose metabolism 326
– – – on muscle and incorporation of arginine 129
– – – on rat diaphragm 94
– – – of stress on levels in newborn infants 175
– – following TRF 137
– – human, immunoassay 55, 309
– – – immunofluorescent identification of cells synthesizing the 309
– – – release induced by hypoglycemia 320
– – – two site assay 59
– – hypoglycemic response 155
– – interaction between and dihydroergotamine 321
– – mitogenic action 31
– – regulation and insulin secretion 90
– – response to β^{1-24} ACTH 318
– – stimulation of thymocyte proliferation 28
– – suppression of release with dexamethasone 171
– – and tolbutamide, insulin response to 157
γ-guanidinobutyramide s. HL 523
γ-guanidinobutyric acid, metabolism 189

H
Hepatic effect of glibenclamide 448
– protein synthesis, effect of hypoglycemic agents on 357
HL 523 (γ-guanidinobutyramide) 76, 189
– blood sugar response of alloxanized mice to 78
– conversion of HL 521 to 92
– GTT in normal and diabetic rats after 78
– treated rats, glycogen in 78
HL 523 ^{14}C, autoradiographs 190
– – disappearance from plasma 189
– – in urine fractions 191
Δ^5-3β-hydroxysteroid dehydrogenase, effect of 3',5'-AMP and dibutyryl 3',5'-AMP on 115
5-hydroxytryptamine and insulin release 305
Hyperaldosteronism, diagnosis 442
Hyperinsulinemia, tolbutamide-induced 233
Hyperinsulinism in genetically obese rats 287
Hypersomatotropism, early effects 326
– experimental 82
Hyperthyroidism, cortisol secretion 437
– effect on insulin response to hyperglycemia 247
Hypoglycemia, insulin-induced plasma 11-hydroxy-corticoids and IRGH in response to 172
– TRIS-induced 381
Hypoglycemic agents, effect on cell-free protein synthesis 357
Hypophysectomy and phosphorylase activity 332
Hypothalamo-pituitary-adrenal axis (HPAA), effect of glucocorticoids on 171
Hypothyroidism, cortisol secretion 437

I, J
Idjwi island, endemic cretinism 431
IgG subclasses, LATS activity among 221
Iodination level of thyroglobulin 423
Iodine concentration of thyroid slices 424
Immunofluoreszent staining by anti-growth hormone serum 311
Immunoreactive insulin (IRI) in hypophysectomized and normal dogs 6
– – levels decrease after birth 74
Inheritance of diabetes 1
Insulin catabolism, labelled, during long-term exercise in man 366
– degradation 217
– – effect of reticuloendothelial blockade 217
– effect of dibutyryl cyclic AMP on plasma 91
– in the fetus 71
– following TRF 137
– fractions, sulphated, biological activity 209
– glucose ratio 6
– half-life in the spontaneous diabetic dog 214
– immunoassay 55
– influence on the conversion of APS to PAPS 153
– – on lipolysis caused by DHE 163
– levels after i.v. tolbutamide 234
– lipogenic effects 98
– in lymph in the exercising hind limb of dog 382
– peripheral, increase after trypsin 61
– plasma, effect of leucine, arginine and epinephrine on 127
– – levels, effect of TRIS on 379
– in plasma of rabbits treated with HL 523 80
– procedures for radioimmunoassay 302
– release and β cell content of 6-phosphogluconate 141
– – glucose-induced, stimulus-secretion coupling 374
– – from human foetal pancreas in vitro 354
– – stimulus-secretion coupling 65

- response, effect of hyperthyroidism on 247
- - following orally ingested glucose 300
- - to glucose 1
- responsiveness of human subcutaneous adipose tissue 266
- ^{35}S, sulphated, electrophoresis 207
- secretin as a dominant factor in the release of 182
- secretion, effect of serotonin 148
- - genetic transmission 5
- - glucose-induced 65
- - significance of 5-hydroxytryptamine for 305
- sensitivity following GH 155
- tissular reacitivity to 71

Insulin-like activity (ILA) in sera of rat fetuses 71
- effect in early hypersomatotropism 326
- response of STH 94

Insulin-producing tumor, transplantable 252
Insulinotropic mechanism of sugars and amino acids 374
Islet cell tumor of golden hamster 252
- of Langerhans, B cell deficient, preparation 37
- microdissected, insulin release from 307
- - of obese-hyperglycemic mice 219
- pancreatic from obese-hyperglycemic mice 141

K

K^+ and insulin secretion 65
Kallikrein and mitotic stimulation in thymus 279
Ketone bodies and glucose metabolism 407
- - production by diabetic liver 18

L

Lactic acid stimulated release of glycerol 340
Leucine, effect upon ^{45}Ca uptake by isolated islets 375
Li^+ and insulin secretion 65
Lipase, intracellular transport and distribution 393
Lipid content of chick embryo hearts 100
Lipids, acetate-1-^{14}C incorporation into 99
Lipogenesis from glucose and palmitate in human adipose tissue 262
- insulin-stimulated, effect of 2-deoxyglucose on 98

Lipolysis, basal, glycerol release as an indicator for in lactate free medium 341
- DHE-stimulated, effect of beta-adrenergic blocking agents 163
- GH-induced 321
- influence of nicotinic acid on 103
- stimulated by glucagon 104

Lipolytic activity of ACTH and some fractions of porcine pituitaries 167
- effect of glucagon in man 291
- pituitary fractions 355

Liver, diabetic 10
- glycogen, effect of L-tryptophan on 278
- human, in vivo perfusion 193
- rat, isolated perfused, insulin degradation 218
- ultrastructure, effect of cyproterone acetate on 44

Long-acting thyroid stimulator (LATS), isoelectric focusing 221
β-LPH, effects on blood platelets and coagulation 344
Lymphocytes, thymic of rat, proliferation 28
Lymphocytolytic response, cortisol injection and 277

M

Magnesium-induced hypocalcemia 63
Mammary glands, effect of UTPH on 361
Medullary thyroid carcinoma with metastases 298
Metaphyseal dysgenesis of cretin 435
3-methyl-glucose 98
Methyl-2-imidazole, influence on D-xylose uptake 96
Microtubules in isolated islets 378
- and microfilaments in islet cell tumor 253

Millipore filter membrane 55
Mitogenic action of GH 31
Monkey, plasma ionic calcium in 48
Mouse, polycythemic 52
Muscle metabolism, influence of lactate on 340
MtT-W15 tumor 82, 326
Myxedema, TSH metabolic clearance rate and production rate in 35

N

Na^+ and insulin secretion 65
Nandrolone 53
Neuropathy, diabetic, upper limbs 386
- subclinical evidence 386

Newborns, blood glucose, glycerol and GH levels 175
Nicotinic acid, influence on lipolysis 103
Non-suppressible insulin-like activity 382
Norepinephrine, plasma, during muscular exercise 368
Nucleotide formation in diabetes 151

O

Obese hyperglycemic mice, insulin release from microdissected islets of 307
- rats, hyperglycemia in 287
- subjects, glucose uptake of adipose tissue from 271

Osteolysis, rat bone in vitro 225
Ouabain effect upon insulin secretion 67
Oxymetholone 53

P

Pancreas, foetal, human, insulin release from 353
- isolated perfused 238
- quantitative histology 285
- slices, incubation 145

Pancreatic protein, incorporation of ^3H-leucine into 357
- responsiveness during long-term exercise in man 366

Parathyroid hormone and andrenocortical secretory rates 344
- - radioimmunoassay 302
- - secretion, calcitonin stimulation 223
- - - inhibition 63
- - stimulated osteolysis 225

Parathyroidectomy, effect on plasma citrate 121
Pentobarbital-induced glucose intolerance 243
Perfusion, rat liver, isolated 10
Phenylpropionate 53
Phosphoadenosine phosphosulphate (PAPS), effect of diabetes of the formation of 151
6-phosphogluconate, rise in microdissected islets 141
Phosphorylase activity, effects of hypophysectomy on 331
Pituitary-adrenal axis 320
Placental protein, human, inhibition of estradiol-progesterone-induced mammary development by 361
Platelets, blood, serotonin content 110
Pregnancy, cortisol and corticosterone during 215
Pregnenolone, conversion to progesterone 114
Progesterone, conversion of pregnenolone 114
Protein kinase assay, effect of ATP concentration in 339
- synthesis, effect of GH 130
- - - of hypoglycemic agents on the hepatic and pancreatic 357
- - influence on D-xylose uptake 96

R

Radioimmunoassay, adsorbent techniques for separation in 301
Renal insufficiency, TSH metabolic clearance rate and production rate in 35
Renin, plasma activity determined by a labelled antibody assay 203
- - - measured as the rate of angiotensin I generation 206
- - effect of low and high sodium diet on 443

Reticuloendothelial system blockade 217
Reticulum, endoplasmic hypertrophy 46

S

^{35}S-Sulphate uptake into chondroitin 152
S. 1513, effect on lipogenesis 264

Sciatic nerve section, effect on blood glucose and on insulin and protein levels in plasma and lymph of dog 284
Secretin, radioimmunoassay 180
Separation of antibody-bound from free hormone in radioimmunoassay 301
Serotonin, accumulation by thrombocytes 110
– insulin release induced by 145
– content in pancreas and duodenum after L-tryptophan 145
Somatotropic hormone (STH), biphasic action 94
Starvation, influence upon serotonin metabolism 110
Steroid, labelled, distribution in plasma 194
Streptozotocin 37
– destruction of insulin-producing B-cells by 238
– effect on the fine structure of beta cell 21
– inhibition of insulin release 23
Sugar, autoregulated mechanism in the liver 16
Sulphuric acid, product of the reaction of concentrated on insulin 210

T
T4 following TRF 137
Testosterone propionate, erythropoietic effect 52
Theophylline, influence on D-xylose uptake by hemidiaphragms 95
– inhibitor of phosphodiesterase 92
Thrombocytes, serotin content during fasting 111
Thymocyte, proliferation by epinephrine 348
Thymolysis, cortison-induced 277
Thymus DNS, incorporation of ^{3}H-doxycytidine into 277
– mitotic activity in 279

Thyrocalcitonin and adrenocortical secretory rates 344
– effect of on ionic and total plasma calcium 48
– inhibition by of thymocyte proliferation 348
Thyroglobulin, human, relation between coefficient of sedimentation of and its iodination level 423

Thyroid follicle cell of guinea-pig treated with triiodothyronine 427
– slices, RNA synthesis in 414
Thyroid-stimulating hormone (TSH), influence of DH on lipolysis caused by 164
– – metabolic clearance rate 34
– – production rate 34
– – radioimmunoassay 34
– – following TRF 137

Thyroiditis, asymptomatic, HTSH in 409
– experimental in guinea-pig thyroid glands 426
– thyroid follicle in a case of in triiodothyronine-treated immunized guinea-pig 428

Thyrotoxic patients, TSH metabolic clearance rate and production rate in 35
Thyrotropin, effect on incorporation of ^{3}H-uridine in subcellular fractions of sheep thyroid slices 417
– measurements, radioimmunological and biological human 409
– stimulation by of uridine incorporation into thyroid slices 414
Thyrotropin-relasing factor (TRF), TSH, HGH, cortisol and ACTH after 139
– hormone and serum H-TSH, HGH, thyroxine, insulin and glucose 137
Tolbutamide, effects on insulin and glucagon secretion 238
– hyperinsulinemia after 233
– insulin response to 157
– sensitivity test 155
Tri-hydroxymethyl-aminomethane, effects on plasma ions 379
Trauma and liver TAT activity 360
Triglycerides, release from diabetic liver 17
Trypsin, increase of plasma insulin after 61
Tryptophan-induced hypoglycemia 145
Tyrosine-α-ketoglutarate transaminase, liver, activity 359

U
Urea formation by perfused rat liver 10
– production in presence of HL 523 80
Uridine metabolism in thyroid slices 420
Uterine arginase activity, estrogenic induction 352
